OTW 32x45 - 32” Compact Water Filled Jersey Barricade

PRODUCT OVERVIEW

The OTW 32" Compact Water Filled Jersey Barricade is a compact, water-fillable plastic barricade used to separate traffic, pedestrians, and work areas where space is limited. Its smaller footprint and lightweight empty design make it easier to place and reposition. Rotationally molded from UV-resistant MDPE, it provides temporary delineation for construction sites, events, staging areas, and other controlled environments.

FEATURES & BENEFITS

- The lightest and most compact OTW construction barricade, built for jobs where devices move often
- Combines the Jersey shape with F-shape geometry in a smaller footprint
- At 32 lb empty, one worker can carry, place, and reposition it alone
- Accepts up to two OTW Solar Type A/C Bi-Directional Barricade Lights
- No additional parts or hardware required for setup
- UV-resistant for impact strength, color retention, and repeated-use durability
- One-year manufacturing defect warranty
