

MID-PROFILE BARRICADE

AR24x96

The AR24x96 Mid-Profile Barricade is most commonly used to designate large airside construction zones, that is, work taking place within the secure zone of airports around active aircraft. Taller and heavier than our low-profile barricade, the AR24x96 is more visible to pilots in larger airplanes. Built-in interlocking pins allow these barricades to connect without additional hardware and each barricade is capable of supporting an optional 360-degree or bi-directional hazard light. This barricade also works extremely well in low-speed construction zones, parking lots, and specialty applications where federal highway construction zone standards do not apply.

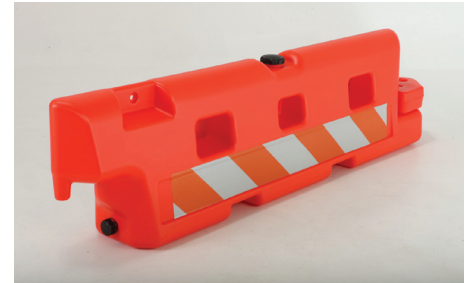

The AR24x96 weighs only 35 pounds empty but once ballasted with water can weigh up to 375 pounds. At 24 inches high, this advantageous height to weight ratio gives the AR24x96 enhanced staying power during inclement weather and high-wind conditions. Realizing that airport construction zones can shift rapidly, we designed this barricade with molded lower forklift points to ease relocation, even when filled with water. Like our other airport safety products the AR24x96 is specifically designed to meet the needs of large and small airports while exceeding FAA safety compliance standards.

FEATURES & BENEFITS

- 100% FOD-free patented connection system
- Requires no additional hardware or parts
- Meets FAA A/C 150/5370-2F
- 8-Year ultraviolet damage protection
- Barricade shape is low enough not to interfere with aircraft
- Forklift points allow for easy relocation when filled with water
- Includes factory-installed high-intensity orange and white reflective sheeting
- "Buy America Act" Compliant

OPTIONAL ACCESSORIES

- One flashing or steady burn solar hazard light
- One bi-directional roadway hazard light

AR24x96

COLORS

- Safety Orange
- White
- Custom colors available (minimum quantity required)

COMPOSITION

- UV-resistant High Density Polyethylene (HDPE)
- Blow molded

SIZE

Height: 24 in / 60.9 cm
Length: 96 in / 2.44 m
Width: 14 in / 35.5 cm

WEIGHT

Empty: 35 lb / 12.7 kg
Full: Apprx 375 lb / 122.5 kg*
**Weight calculation based on 30 standard US gallons of water*
