BILLBOARD BARRICADE ADAPTER

CC42x96 ADAPTER

We realize many of our customers have made a significant investment in steel barricades and replacing all of them at once might not be feasible. This is why we designed an adapter to pair the Billboard Barricade with older steel barricades. The Barricade Adapter helps organizations make use of all their barricades and replenish their inventory over time as steel products degrade.

The Barricade Adapter will quickly and easily connect to any adjacent steel crowd control product and is designed to require only minimal hardware (simple wrench or ratchet). The method of installation also helps prevent unwanted tampering with barricades during an event.

FEATURES & BENEFITS

- Connects the Billboard Barricade to any steel barricade
- Constructed from high quality aluminum
- Quick and easy connection for simple installation
- One-year manufacturing defect warranty
- Designed to last a minimum of eight years
