

OTW SAFETY

Case Study: OTW Barricades at Gunnison-Crested Butte Regional Airport

CHALLENGES

Ongoing
Construction

Extreme
Temperatures

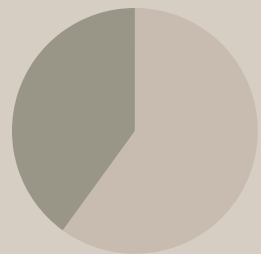

Active Flights
& Military Use

RESULTS

With the help of OTW's low-profile airport barricades, Gunnison Crested-Butte Airport has been able to maintain operations while bringing in exciting renovations!

An average of 35k passengers safely served per year

Almost 60% of the way through new renovations

12+ years of successful barricade use, and counting

Our airport barricades have the following standards and features:

- Meets FAA AC150/5370-2G "Operational Safety on Airports During Construction"
- DoD Unified Facilities Criteria (UFC) 3-260-01 "Airfield and Heliport Planning and Design"
- Are "Buy America Act" Compliant
- Integrated connection design and large internal capacity, eliminating the need for external weights, such as sandbags
- Does not violate wingtip clearance safety standards
- Includes factory-installed high-intensity orange and white reflective sheeting at no additional cost
- One-year manufacturing defect warranty
