OTW AR24x96 - 24" MID PROFILE AIRPORT BARRICADE

GSA Schedule

GSA MAS Contract: GS-03F-005BA · SIN: 339999S
NSN: 5660-01-469-7542

PRODUCT OVERVIEW

The OTW AR24x96 - 24" Mid Profile Airport Barricade is used to designate large airside construction zones while preserving aircraft clearance. Taller than our low profile barricade, the AR24x96 is designed to be more visible to pilots in larger aircraft. Its mid-profile, UV-stabilized HDPE construction, factory-installed high-intensity reflective sheeting, and FOD-free connection system make it a safe and efficient barricade solution for airport construction projects.

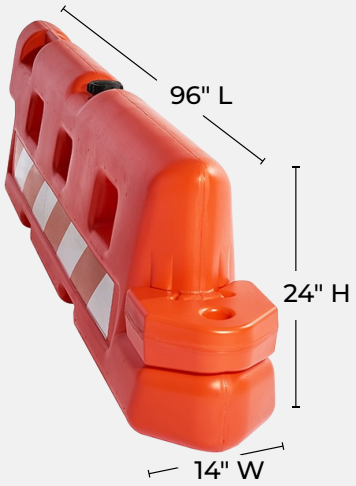

FEATURES & BENEFITS

- Mid-profile shape increases visibility for pilots in larger aircraft
- FOD-free connection requires no external hardware or additional parts
- Built-in ballast capacity eliminates the need for external weights
- Stable in wind when ballasted
- Includes factory-installed high-intensity orange and white reflective sheeting
- Made from durable, UV-stabilized, blow-molded HDPE
- Supports compliance with FAA AC 150/5370-2G and UFC 3-260-01
- One-year manufacturing defect warranty

TECHNICAL SPECIFICATIONS

Height	24 in / 60.96 cm
Length	96 in / 243.84 cm
Width	14 in / 35.56 cm
Empty Weight	35 lb / 15.9 kg
Max Ballast Weight (approx.)	615 lb / 279 kg (69 US gal / 261.2 L of water)
Material	Blow-molded UV-stabilized HDPE
Colors	Orange, White, Custom*

**Custom colors available with minimum order quantity.*
Note: Ballast barricades with water after positioning for stability in high-wind conditions.

OPTIONAL ACCESSORIES
