

OTW SAFETY

VERTICAL PANEL

VERTICAL PANEL: VP-O-HIP-TRF-C
WEIGHTED BASE: VP-20LB-BASE

Our vertical panel is designed to tolerate impacts from vehicles. This traffic sign features a bright orange design along with high-intensity prismatic reflective stripes for both day and night usage. Reflective sheeting permits centerline traffic deployment in most jurisdictions.

The vertical channelizer acts as a visual warning for construction sites, parking lots, pedestrian crossings and other work zones. It has a molded-in top handle that also mounts LED flashers.

The 4-pound vertical panel barricade itself is manufactured in the US. The molded handle grip ensures that each panel is easy to manage, and the heavy-duty engineering ensures that they are perfect for use in any weather.

Each vertical panel stands 42" tall and has a width of 12" inches at the base and 9" at the top. These dimensions ensure that the panels are distinguishable from their surroundings.

FEATURES & BENEFITS

- Meets MUTCD Standards
- Approved on PennDOT Bulletin 15
- Easy to deploy and stackable for easy storage
- NCHRP-350 Certified
- Comes with reflective sheeting
- Molded grip for easy handling
- One-year manufacturing defect warranty on all products

SPECIFICATIONS

- Vertical Panel: 42" x 12" (base) x 9" (top)
- Rubber Post-Consumer Waste Base: 21"x18"
- Individual Panel: 4lbs
- Rubber Post-Consumer Waste Base: 20.5lbs
