

LOW PROFILE DELINEATOR

AR3-LPD

Product Overview

The OTW Safety AR3 Low Profile Delineator (LPD) is engineered to enhance visibility and stability around airfield construction zones, airports, and heliports. Offering superior performance over cones and lightweight markers, the AR3 provides a frangible, jet-blast-resistant solution with minimal interference for nearby aircraft.

Weighing just 5.4 pounds empty and up to 45 pounds when filled with water, the AR3 is easily deployable and highly resistant to environmental factors like jet blast and prop wash. Its bright OSHA safety orange color ensures visibility for pilots and ground crews, while the stackable design allows for efficient storage.

Features & Benefits

- Jet Blast Resistant: Designed to stay in place under harsh airfield conditions
- Frangible Construction: Safe around aircraft
- High Visibility: 3° angled sides improve visibility for pilots
- Stackable Design: Efficient for storage and transport
- Durable Material: UV-resistant rotationally molded HDPE
- Buy America Act Compliant

Optional Add-Ons

- AR Flag (Orange or White)
- Hazard Lights
- Delineator Posts

Color options

- Standard Body Color: OSHA Safety Orange

Composition

Rotationally molded UV-resistant High Density Polyethylene (HDPE)

Technical Specification

- Material: UV-resistant rotationally molded High-Density Polyethylene (HDPE)
- Dimensions:
 - Height: 12 in / 30.5 cm
 - Length: 12 in / 30.5 cm
 - Width: 12 in / 30.5 cm
 - Wall Thickness: 0.20 in / 5.08 mm
- Weight:
 - Empty: 5.4 lbs / 2.45 kg
 - Full: ~45 lbs / 20.6 kg (based on 5 gallons of water)

Pallet Loading

Dimensions: 48" L x 48" W x 48" H
Capacity: 64 units per pallet
