

OTW METAL BARRICADE

CC-42X96-GS-FF / CC-42X96-GS-FFSM

The OTW steel barricades are ideal for crowd control in a variety of weather conditions. Galvanized steel construction is resistant to rust. Barricades are designed to link together end-to-end to provide continuous delineation. Additionally, the barricades' feet can be staked into the ground to prevent movement by strong winds or pedestrians. Barricades can be purchased with optional threading for attaching signage

FEATURES AND BENEFITS

- Galvanized steel construction offers weather protection and professional appearance
- Barricades can be staked into the ground for added stability
- Barricades can be outfitted with custom signage when purchased with optional signage threading
